

Milena Georgieva

Front-end Web Developer

I am looking to apply my skills in ReactJS, Node.js and JavaScript as Junior Web Developer. I am currently near completion of the Full-Stack JavaScript Web Developer program at SoftUni. I have over 2 years of practical experience creating projects and solving tasks with HTML, CSS, ReactJS, JavaScript, Node.js and Express. I am comfortable using MongoDB, GitHub, Tailwind and Bootstrap. I am currently learning new skills, such as Docker and Google Cloud Platform.

EDUCATION

JS Web Developer

Software University (SoftUni)

03/2023 - Present

Latest Courses

- ReactJS: I developed advanced knowledge in custom hooks, component lifecycle, and higher-order components. Also, I learned how to fetch data, manage state, and use the Context API. Understood key features such as, useReducer, conditional rendering, controlled and uncontrolled forms and styled my SPA applications using CSS Modules, Bootstrap and Tailwind. Take a look at my Sprout Hub SPA at <https://sprout-hub-458309.web.app/posts> (code available at <https://github.com/MilenaGeorgieva95/Sprout-Hub>)
- JS Back-End: I build a complete REST API's from scratch using Node.js, Express.js, MongoDB and Mongoose (code available at <https://github.com/MilenaGeorgieva95/JS-Back-End-SoftUni>). The main learning objectives include creating servers, understanding server-client architecture, and building data-driven web applications with clean structure.
- JS Applications: Created SPA web applications, implementing JS, AJAX, routing, modules architecture and DOM events. Worked with authorization tokens, ids, and data returned by the server to implement register, login, logout, REST and AJAX functionality. Used GitBash and JSON format.
- JS Advanced: Applied functions concepts and OOP, while implementing DOM events functionality. Learned about prototype, inheritance and closures. Created static methods, sibling classes and get/set functionality. Used bind and apply. Worked with RegExp. Wrote Unit tests with Mocha and Chai.

WORK EXPERIENCE

Optical Assistant

Specsavers

06/2016 - 12/2022

Coventry, Uk

Achievements/Tasks

- Demonstrated organizational and teamwork skills and professional behaviour toward customers, peers, providers, management and visitors.
- Excellent problem solving and communication skills, working to meet and exceed customer expectations.

PERSONAL PROJECTS

Sprout Hub SPA Application (03/2023 - Present)

- Sprout Hub is a modern Single Page Application (SPA) built with React.js, providing an interactive platform for users to create, manage, and engage with content. The project follows best practices in front-end development and connects to the SoftUni Practice Server as the back-end.
- The user is able to register, login and logout. Also, to view, create, like and comment on posts, and view, edit and delete own posts.
